Date of birth:

07/06/2001

Town:

Warsaw

I'm looking for a job involving C#, React, SQL, and MongoDB. I have three years of solid practical experience, gained from both commercial and in-house projects.

I've successfully implemented various tools and systems, and worked collaboratively in teams, which allowed me to develop both my technical and communication skills. I'm eager to take on new assignments or challenges that will allow me to further develop my skills and gain experience in a dynamic IT environment.

Skills

React.js   .NET   C#   SQL   MongoDB

Professional experience

10/2024 – present
[11 months]

Fullstack C# + React developer
Trackeo / Warsaw

Brief job description: I develop a shopping mall management system on a daily basis, working with technologies such as MongoDB, MUI, and a modern frontend and backend stack. I maintain and implement new features in the application, ensuring code quality and data integration.

01.2022 – present
[3 years 8 months]

Support
Trackeo / Warsaw

Brief job description: Email customer service, solving problems related to the production system, close communication with the team.

Tools I work with: Office Suite, Azure DevOps, Teams, Slack, FreshDesk

01.2024 – 10.2024

Programmer - Intern

[10 months]   Simeo Olympics / Warsaw

                                 Fullstack Angular + C# .NET, and MSSQL Developer. I was responsible for creating
                                 internal tools for client/team needs.

10.2019 – 10.2019   **Professional internships**
[1 month]   JMP Flowers / Stÿÿyca

                                 Brief job description: As part
                                 of my internship, I created my first desktop applications using Windows Forms (C#) under
                                 the supervision of a programmer. The work focused on learning the basics of programming,
                                 creating simple interfaces, and managing application logic.

Knowledge of languages

                                 English: intermediate level

Education

09.2021 – present   **Warsaw University of Technology**
[4 years]   Field of study: computer science
                                 Specialization: Software Engineering
                                 Education level: engineer

                                 Additional information: This
                                 year I am defending my engineering thesis, I have had contact with a wide range of topics
                                 related to programming/databases/computer networks.
